### *Drawings*

1. The drawings were received on March 6, 2003. These drawings are not approved for entry because the new Figure 2b introduces new matter as stated below.

### *Specification*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of 37 CFR 1.71(a)-(c):

- (a) The specification must include a written description of the invention or discovery and of the manner and process of making and using the same, and is required to be in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which the invention or discovery appertains, or with which it is most nearly connected, to make and use the same.
- (b) The specification must set forth the precise invention for which a patent is solicited, in such manner as to distinguish it from other inventions and from what is old. It must describe completely a specific embodiment of the process, machine, manufacture, composition of matter or improvement invented, and must explain the mode of operation or principle whenever applicable. The best mode contemplated by the inventor of carrying out his invention must be set forth.
- (c) In the case of an improvement, the specification must particularly point out the part or parts of the process, machine, manufacture, or composition of matter to which the improvement relates, and the description should be confined to the specific improvement and to such parts as necessarily cooperate with it or as may be necessary to a complete understanding or description of it.

The specification is objected to under 37 CFR 1.71, as the specification, as originally filed, does not provide support for the new matter as now claimed. On page 10, lines 21-22, "In an alternative embodiment, tapered edge 115 can be more or less tapered on front wall 105 and/or back wall 205, for example, as shown in Fig. 2b". The phrase more or less tapered does not mean the tapered edge tapers to a single edge one of coplanar or substantially coplanar with a side of the body as recited in claims 46-50. Applicant is required to cancel the new matter in the reply to this Office Action.

Art Unit: 3728

3. Claims 46-50 are rejected under 35 USC 112, first paragraph, for the reasons set forth in the objection to the specification.

*Allowable Subject Matter*

4. Claims 1, 3-17, 19-32, 34-39, 43 and 44 are allowed.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luan K. Bui whose telephone number is (703) 305-5861.
